Art Unit: 1775

#### **DETAILED ACTION**

### Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 1-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 6,132,889 to Welty in view of U.S. Patent No. 6,154,311 to Simmons, Jr.

Welty discloses an article, such as a faucet (column 1, lines 9-26), with a multi-layer coating (column 1, lines 42-64) comprising a nickel layer with a refractory metal layer deposited on the nickel layer. A refractory metal compound layer, such as zirconium nitride or titanium nitride (column 4, lines 34-48), is deposited on the refractory metal layer. Deposited on the refractory metal compound layer is a layer comprised of a refractory metal oxide or the reaction products of a refractory metal, oxygen and nitrogen. Welty discloses that the nickel layer provides improved corrosion protection and functions as a leveling layer which tends to cover or fill in imperfections on the substrate (column 3, lines 23-48).

Welty does not mention a polymer layer, but Simmons Jr. discloses the use of a polymer layer, in place of a nickel layer, in articles such as faucets, to provide improved corrosion resistance and to level substrates by forming a smooth hard surface (column 2, lines 9-45 and column 6, lines 15-44). It would have been obvious to one having ordinary skill in the art at the time the invention was made to replace the nickel layer of Welty, with the polymer layer of

Application/Control Number: 09/747,250

Art Unit: 1775

Simmons Jr., because the polymer layer provides a viable alternative to electroplating in addition to providing corrosion resistance while leveling a substrate by forming a smooth hard surface.

Regarding claim 9, it would have been obvious to one having ordinary skill in the art at the time the invention was made to select epoxy urethane as the polymeric base coat material. because epoxy urethane is a suitable polymer capable of forming a smooth hard surface over the covered article.

#### Response to Arguments

3. Applicant's arguments filed 1/9/2002 have been fully considered but they are not persuasive.

The applicant argues that the only directions or reasons for replacing the nickel layer of Welty with the polymer layer of Simmons Jr. are found in the applicants disclosure. The applicant argues that the examiner is using hindsight reasoning. The examiner directs the applicant to the Simmons, Jr. reference. Simmons, Jr. clearly discloses that it is known in the art to use a polymer layer as a viable alternative to nickel electroplating in articles such as plumbing fixtures (column 2, lines 27-33). Simmons, Jr. even discloses that the articles may be chrome or gold-toned and specifically cites the faucet industry (column 2, lines 36-44). Simmons, Jr. clearly discloses that it is known in the art to use a polymer layer as a viable alternative to nickel electroplating in the faucet industry.

## Conclusion

4. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Page 3

Art Unit: 1775

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andrew Piziali whose telephone number is (703) 306-0145. The examiner can normally be reached on Monday-Friday (8:00-4:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Deborah Jones can be reached on (703) 308-3822. The fax numbers for the organization where this application or proceeding is assigned are (703) 305-5408 for regular communications and (703) 305-3599 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 306-5665.
